

GO-TO GUIDE FOR ALL YOUR SURPLUS AND INUTILE IT EQUIPMENT DISPOSAL RELATED QUERIES

KNOW EVERYTHING ABOUT USED & SURPLUS TELECOM
AND VOIP EQUIPMENT DISPOSAL!

WHY WE WROTE THIS GUIDE

According to Wikipedia, a paragraph is a self-contained unit of a discourse in writing dealing with a particular point or idea. A paragraph consists of one or more sentences. Though not required by the syntax of any language, paragraphs are usually an expected part of formal writing, used to organize longer prose.

This guide is specifically written for those looking to sell their used & surplus telecom equipment and has little to no clue on where to start, whom to approach. Let us make your disposal journey with Telecom Recycle feasible with this quick guide.”

INTRODUCTION TO THE COMPANY

Telecom Recycle is a leading IT Asset and Disposition (ITAD) company specialized in buying and recycling of redundant business telephone systems and handsets.

We are proud to offer you an environmentally green alternative and complete telephony buying solution for all your business telecom needs.

As specialists in asset recovery, we help companies of all sizes recapture maximum value. We make the process simple, fast, and easy, and we promise you will receive top-dollar for your used equipment.

SECTION I:

FREQUENTLY ASKED QUESTIONS: OLD, SURPLUS OR OUTDATED TELECOM EQUIPMENT

Q. Why is it essential to hire an ITAD company to take care of your IT assets?

IT Asset Disposition, or simply ITAD, is the full-fledged process involving recycling and disposal of old and inutile IT assets in a proper and responsible manner, strictly adhering to the environmental policies laid out by the government. An ITAD company ensures that you get the maximum value out of your old and outdated devices and provides you with step by step reporting of the asset recovery & recycling process- from assessment, packaging to final shipping and delivery.

Q. What types of Telecom Equipment do you buy?

We buy a wide range of excess, outdated, but working telecommunications & networking equipment including telephone sets & systems, routers, VoIP endpoints, switches, wireless phones, and smartphones.

Q. What happens if I'm not sure exactly what equipment is in my inventory?

Drop us a request anyway. We'll work with you to find equipment that can be reused, those who need modernization, ones you could sell and finally, the equipment that needs to dispose of. Our team will then sit with you to chalk out the best and actionable plan for your inutile equipment and execute them effectively so you recoup the maximum value of them. All equipment moved are properly counted and numbered for a more transparent service.

Q. Does the volume of my inventory matter?

With us, you don't need to worry about the volume or the size. Whether you own 2 pieces or 200, we'll buy them all as long as they are in working condition.

Q. How does Telecom Recycle calculate how much money my equipment is worth?

We use the latest technology to run a thorough market evaluation for each equipment type and come up with a fair quote.

SECTION II:

GET RID OF YOUR SURPLUS & INUTILE EQUIPMENT IN 4 SIMPLE STEPS

Step 1: Fill and Submit Bid Form

Send us your list of equipment

Fill up and submit the bid request form with a list of all the equipment details (including quantities, model numbers, colors, descriptions, etc.) and any other necessary information to get a free quote.

List Equipment Details

Fields marked with * are required.

Company Name:	<input type="text"/>	*Do you own equipment?:	Yes <input type="text"/>
Title:	<input type="text"/>	*Are you brokering or liquidating this equipment for third party?:	Yes <input type="text"/>
*First Name:	<input type="text"/>	*Equipment Availability:	Now <input type="text"/>

[SEND INFORMATION >](#)

You can find the form: [HERE](#)

You can also mail us your bid request at bid@telecomrecycle.com

Step 2: Value Assessment and Releasing of Quote

Receive a lightning-fast bid with maximum cash value

Our Liquidation Expert will access the equipment you are planning to sell and provide you a quote to get you a fair and accurate bid with maximum cash value. We value time and money, hence no time is wasted on unnecessary negotiations!

Step 3: Collection and Payment

Safe & secure shipping for your valuable equipment

Once agreed on the price, our quality inspectors will do an onsite inspection of the equipment, providing you with quick removal and payment services. We promise top quality services including safe handling and procurement, packing, removals, and shipping without being a hassle to your ongoing business scene.

Step 4: Top Dollar Paid

Be assured of the best return on your used and surplus IT equipment.

We get you fair market value prices so you can recapture maximum value off your once-valuable equipment. Simple, fast with a value for every dollar paid!

SECTION III:

LIST OF BRANDS & EQUIPMENT WE BUY

Telecom recycle has the domain expertise and a dedicated team of liquidation experts that could help resolve all your IT Asset recovery related queries. We buy all models of equipment -used, new or surplus telecom and network hardware.
